PATIENT'S NAME : MR. PURAV UDAY DESAI

ID No : 2547887

REF. BY Dr. : Tejas A.Contractors

AGE / SEX : 23 Years / M

REG.DATE/TIME : 26/07/2025 11:38 AM

SAMPLE COLL.TIME : 26/07/2025 11:43 AM

REPORT DATE : 26/07/2025 12:24 PM

PRINT DATE : 26/07/2025 3:07 PM

Investigation	Result
* <u>WIDAL TEST</u>	
S.typhi (O Antigen)	1 : 40
S.typhi (H Antigen)	1 : 40
S.paratyphi (AH Antigen)	NO AGGLUTINATION
S.paratyphi (BH Antigen)	NO AGGLUTINATION

Method : Agglutination Assay

Note : Titre of more than 1:80 is significant. Rising titre is more definite evidence of infection.This is a screening test.False positive and negative results are known.

Response to treatment cannot be corelated with the antibody levels.The antibody titres may be positive for few days to months after the infection has been treated.

Confirmatory test is isolation of organisms by blood/stool culture.
